

TEAM ALBERTA

Looking to lower your grain conditioning costs and increase efficiencies?

Team Alberta is seeking farmers interested in participating in a three-year study to assess the on-farm energy consumption and efficiency of grain conditioning systems. The goal is to assess various systems, particularly heated air drying, in-bin natural air drying (NAD) and in-bin NAD with supplemental heat; however, Team Alberta would like to hear from all farmers with any system that may be interested in participating.

What is in it for you?

By allowing us to (anonymously) monitor your grain conditioning energy use, you will get expert advice on how to improve your efficiencies and reduce the costs on your farm. Plus, you will help us devise policies, programs and advocacy strategies to reduce the cost burden associated with grain conditioning in Alberta.

Learn more and volunteer by calling 403-219-6263 or visit any of the Team Alberta crop commission websites.

Team Alberta represents a working collaboration between four of Alberta's crop commissions: Alberta Barley, Alberta Canola, Alberta Pulse Growers and the Alberta Wheat Commission.

We work together with the aim to provide input to policy makers, ensure long-term access to markets, promote the sustainability of the crop sector, and advocate on behalf of farmers while enabling grass-roots advocacy by our farmer members themselves.
