APG AGRONOMY VIDEOS SHARE LATEST BEST PRACTICE INFORMATION FROM THE EXPERTS

Alberta Pulse Growers (APG) is committed to providing growers with the latest agronomy information when they need it. An important component of this knowledge transfer is the development of videos in which agronomy experts communicate the latest knowledge and best practices with farmers. Below are some of the agronomy videos that APG has been involved in developing over the past year. These videos and others are available on the Alberta Pulse Growers YouTube page. To be notified about the latest agronomy videos as soon as they are available, sign up for the APG app.

Predicting the Future of Pulse Diseases

The Story of Beans

Assessing Ascochyta

When Pea Leaf Weevil Attacks!

Is It Time for Fungicide???

Nodulation Scoring

Desiccation and Pre-Harvest Timing for Peas

Staging Faba Beans

Pea, Faba Bean and Red Lentil Agronomy
