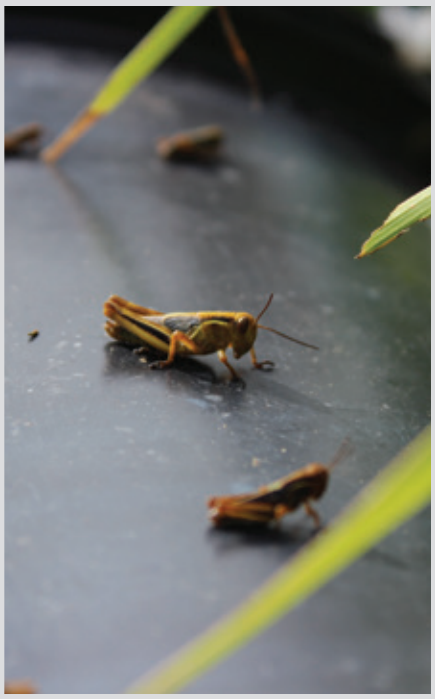
2022 CROP WALKS IN PICTURES

Alberta Pulse Growers sponsored and participated in many educational events across the province this summer. On these pages are an example of some of the research and extension topics that were shared with producers and industry representatives who attended these crop walks, field days and other agronomy events. Watch APG's website or sign up for the APG app to find out about next year's summer events!

Lakeland College Research Scientist Robyne Davidson discusses pea and canola intercropping at the Zone 3 crop walk in Namao.

Digging up a pea plant shows possible Aphanomyces root rot at Linden, AB.

Zone 1 Director Greg Stamp shares the history of the Enchant area and growing conditions with the APG directors and staff on the Growing with Pulses summer tour in mid-July.



Grasshoppers are present on a July 8 visit to a Carmangay pulse farm.

John Kolk, APG Director at Large (Bean), explains about growing beans to directors and staff from all over the province on the Growing with Pulses summer tour.

Visitors to Lakeland College Agronomy Day took in a demonstration of WEED-IT technology in early July.

Lakeland College's Robyne Davidson talks pulses while APG's Nevin Rosaasen looks for a suitable plant to dig up to show nodules to the group assembled for the College's Agronomy Day.

Pinto beans in motion at the Viterra plant in Taber.

Faba bean seeds in a pod at the Zone 3 crop walk in Namao.
