INSECTS IN YOUR FIELDS

THE FIELD HEROES CAMPAIGN IS AN INTEGRATED AGRONOMY EXTENSION PROJECT FUNDED BY WESTERN GRAINS RESEARCH FOUNDATION.

The Field Heroes campaign started in 2017 as an initiative of field crop entomologists with a special interest in beneficial insects in crops. It includes researchers from all levels of government, post-secondary institutions, and industry stakeholders sharing the science around beneficial insects and healthy insect ecosystems in Western Canadian fields.

The campaign is currently interested in understanding experiences with insects in crops. Both farmers and their professional advisors - P.Ag., CCA, etc. - are invited to share their perspectives in this short (approx. 3 minute).
